

## **Assignment 2.2 – Final Project Development 1**

### **1. Type of Website:**

I have decided to design a "Personal Portfolio Website". This website will serve as an online showcase of my skills, projects, and experiences, targeting potential employers, clients, and collaborators. The primary purpose is to create a professional online presence, allowing visitors to get to know me, my work, and capabilities.

### **2. General Goals:**

- **Showcase Professionalism:** The website aims to present a polished and professional image, highlighting my skills and achievements in a visually appealing manner.
- **Facilitate Networking:** Enable easy contact and networking opportunities by providing clear contact information and links to professional social profiles.
- **Highlight Achievements:** Emphasize significant projects, achievements, and experiences to build credibility and showcase capabilities effectively.

### **3. Supporting Elements:**

- **Photos:** Include high-quality images of myself, as well as visuals related to my projects and work environments to provide a personal touch.
- **Portfolio Galleries:** Display visually appealing galleries of completed projects with detailed descriptions and outcomes.
- **Resume Download:** Include a downloadable resume to provide detailed information about my professional background.
- **Testimonials:** If available, incorporate client or colleague testimonials to build trust and credibility.
- **Interactive Timeline:** Use animations or interactive elements to create a timeline showcasing my career milestones and achievements.
- **Skills Infographics:** Utilize visual elements such as infographics to represent my skillset in a clear and engaging manner.
- **Blog Section:** Consider incorporating a blog section to share insights, thoughts, and updates related to my field of expertise.
- **Social Media Integration:** Integrate social media buttons to connect visitors with my professional profiles on platforms like LinkedIn and GitHub.
- **Contact Form:** Include a user-friendly contact form to encourage interaction and inquiries.

By incorporating these elements, the website will effectively meet its goals and create a compelling online presence for professional growth and networking opportunities.
